or www.discoveryhealth.com

Replay version available beginning November 14.

- Our experienced interventionalists are authorities in this minimally invasive procedure used to block blood supply to fibroid growths.
- Using percutaneous, femoral access, the radiologic team embolizes uterine arteries to shrink fibroid masses, in this alternative to myomectomy and hysterectomy.
- Our experts will discuss UFE results, recovery advantages, and implications for women who want to later become pregnant.

Physicians who wish to discuss a case or refer a patient to a Jefferson interventional radiologist, please call **215-955-0215**.

This activity has been approved for AMA PRA Category 1 credit. Jefferson Medical College of Thomas Jefferson University, as a member of the Consortium for Academic Continuing Medical Education, is accredited by the ACCME to provide continuing medical education for physicians.
